# **IMISE Student $\text{\LaTeX}$ Beamer Theme v3.**

## **The title can use three lines but doesn't have to.**

Leipzig, June 2023

Konrad Höffner

**imise.**

# How to use this Template

1. Clone or download the complete directory from <https://github.com/IMISE/imise-beamertheme>
2. Rename template.tex, replace title, subtitle, author, date, address, email address and telephone number.
3. If you know that your target display has an aspect ratio other than 16:10, uncomment a different line at the top of imisetest.tex.
4. If your presentation is in German, change `\usepackage[english]{babel}` to `\usepackage[ngerman]{babel}`.
5. Fill with your presentation.
6. Compile with xelatex or [tectonic](<https://github.com/tectonic-typesetting/tectonic>)
7. pdfflatex works too but doesn't include the custom font. pdfflatex twice the first time to get the graphical elements correct.

# Example Slide

- ▶ this is a bullet point
- ▶ this is a clickable link: <http://www.imise.de>

# Tables

advice number	advice
1	Use the booktabs package to get nice horizontal lines.
2	Never use vertical lines in tables.
3	Use tabulary if your content is so long that it fills the whole width and maybe even needs line breaks.

# Colors

The following colors can be used for diagrams, tables and emphasis. You may use shades of the colors in 20% steps for purposes like diagrams.

Identifier	Color	Shades	RGB
medibblue		   	(0, 138, 201)
mixblue		   	(0, 167, 214)
aquamarine		   	(0, 194, 209)
black		   	(0, 0, 0)

# IMISE Presentation Rules

- ▶ you can usually choose between English and German
- ▶ don't go over the allotted time
  - ▶ practise beforehand to estimate your presentation duration
  - ▶ advice: use a stopwatch or have someone signal you when you have 10, 5, 1 minutes left
